The future

Tools

In December 2018 WordPress version 5 was released - it included a brand new Editor, called the Block Editor (Gutenberg)

**Blocks can be mixed and
matched to customize the
content of any page or post**

Useful Tools

The screenshot shows the homepage of WPTD (WordPress Theme Detector). At the top, the logo "WPTD" is displayed in large, bold, white letters on a blue background, with "WPThemeDetector" written below it in a smaller font. Below the logo is a search bar with the placeholder text "Site to check:" and a green button labeled "Experience the magic of WPTD!". The main content area has a dark blue background and features the heading "Have you ever wondered... What WordPress theme is that awesome site using?". Below this heading is a paragraph explaining the tool's purpose: "If you guess that a site you like uses WordPress, enter its address and hit the button. Our tool will analyze it for you and will display a whole lot of information about the WordPress theme and plugins being used. And more." To the left of this text is an icon of a laptop with a magnifying glass over it. To the right is another paragraph: "WordPress Theme Detector is a free tool that allows you to find all the details about the WordPress theme and plugins currently being used by a site."
